San Diego, CA

Make Differences

Our clinics are all fully accredited by all pertinent regulatory authorities, featuring North America's leading physicians, cutting-edge facilities, and the most advanced medical equipment. We are committed to upholding the highest standards of service quality, ensuring the provision of reliable and exceptional healthcare.

Our stem cell therapy primarily focuses on anti-aging and rejuvenative treatments. We specialize in clinical improvements for autoimmune, neurological, metabolic, and other complex conditions that are often difficult to treat or ineffective with conventional medical methods.

About us

We are a team of distinguished professors, seasoned consultants, and technology innovators specializing in information technology, biotechnology, and artificial intelligence. At the forefront of cutting-edge technologies, we offer cross-sector consultation and comprehensive solutions to address both business and personal needs of our institutional and individual clients. Our mission is to bridge the gap between technological advancements and practical applications, ensuring symbiotic growth for both carbon-based life forms and silicon-based entities.

Fully Compliant + High Quality

✓ Full licensed & Compliant

✓ Live Stem Cells - Never Frozen

(Real photo of licenses and permits)

(Real photo of stem cells labs)

All our clinics are certified by the federal and local authorities:

- Solicitud de Autorización Sanitaria (SAS)
- Certificado de Buenas Prácticas de Fabricación (BPF)
- Good Manufacturing Practices (GMP) by COFEPRIS (Comisión Federal para la Protección contra Riesgos Sanitarios)

All our clinics have on-site stem cell lab, therefore our stem cells are:

- 100% live cells and never frozen
- 100% free of preservatives, DMSO (Dimethyl Sulfoxide), and EDTA (Ethylenediaminetetraacetic Acid), which can cause headaches, kidney damage, blood disorders, and more.
- Over 99% viability and potency

Product & Services

- Neurological Stem Cell Therapy
- Anti-aging Stem Cell Therapy
- Immunological Stem Cell Therapy
- Metabolic Stem Cell Therapy
- Ophthalmic Stem Cell Therapy
- Autism Stem Cell Therapy
- Male Wellness Stem Therapy
- Female Wellness Stem Cell Therapy
- Male Sexual Enhancement Stem Cell Therapy
- Prostate Stem Cell Therapy

Customer Journey

Pre-Therapy Examination & Imaging

Category	Test/Service	
Genomic Tests		
	Whole Genome Sequencing (20,000+ genes).	
	Monogenic Genetic Disorder Screening	
	Polygenic Risk Assessment.	
	Pharmacogenomics	
	Nutrition and Health Characteristics	
Blood Tests		
	CBC (Complete Blood Count).	
	Cancer Biomarkers (male-specific, female-specific).	
	Liver Function	
	Kidney Function	
	HBV	
	Thyroid Function	
	Five Myocardial Enzyme Profile	
	Pre Diabetes (including insulin sensitivity).	
	Lipid Profile	
	Homocysteine levels.	
	Bone Metabolism Markers	
	Hematopoietic Material	
	Electrolyte Panel	
	Urine Test	
	Cancer Screering	
		WB-MRI
		Low-Dose CT for Lung Cancer
Breast Ultrasound and Mammography for Breast Cancer (female)		
Thyroid Ultrasound for Thyroid Cancer.		
TCT and HPV Testing for Cervical Cancer (female)		
Colonoscopy or alternative methods for Colon Cancer.		
C13 UBT for Stomach Cancer.		

Metabolic Assessments	
	Continuous Glucose Monitoring (CGM).
	Body Composition Analysis (via MRI).
	Hormonal Levels Assessment.
	Insulin Sensitivity Test
	Thyroid Function
	Bone Density Tests.
Cardiovascular Tests	
	24-hour Holter ECG
	Lipid Profile
	Homocysteine
	Carotid Ultrasound
	CT Coronary Artery Calcification Score
	Electrocardiogram
	Echocardiography
Neuro/Brain Assessments	
	MRI of the Brain and Noncontrast MRI of the Cerebral Blood Vessels
	Alzheimer's Disease Risk Analysis
Report Analysis	Face-to-Face Test Report Consultation (30 minutes)

Therapy Procedures

- ✔ Pre-therapy physician consultation
- ✔ Medical history review
- ✔ Imaging and lab diagnosis (optional)
- ✔ Conditioning infusion IV
- ✔ Stem cell IV
- ✔ Post-IV observation
- ✔ Booster infusion IV and injection (optional)
- ✔ Follow up physician consultation

A yellow circular icon containing a white checkmark.

AUTOLOGOUS MSCs

- They do not replicate fast enough when cultured.
- These come from the patient's own body.
- They are the only type of MSCs available in the USA, Canada, Australia, and most European countries due to regulations that do not allow the administration of cultured and expanded MSCs.
- If a patient has an autoimmune disease, the use of its own stem cells is not recommended since the MSCs are not working properly.
- They are generally obtained from bone marrow and adipose tissue, which requires a considerably painful procedure for the patient.
- The biggest disadvantage when doing a treatment with these MSCs in another country is that since they cannot be replicated and expanded and must be administered the same day, the number of MSCs applied for the treatment is insufficient to have good results.

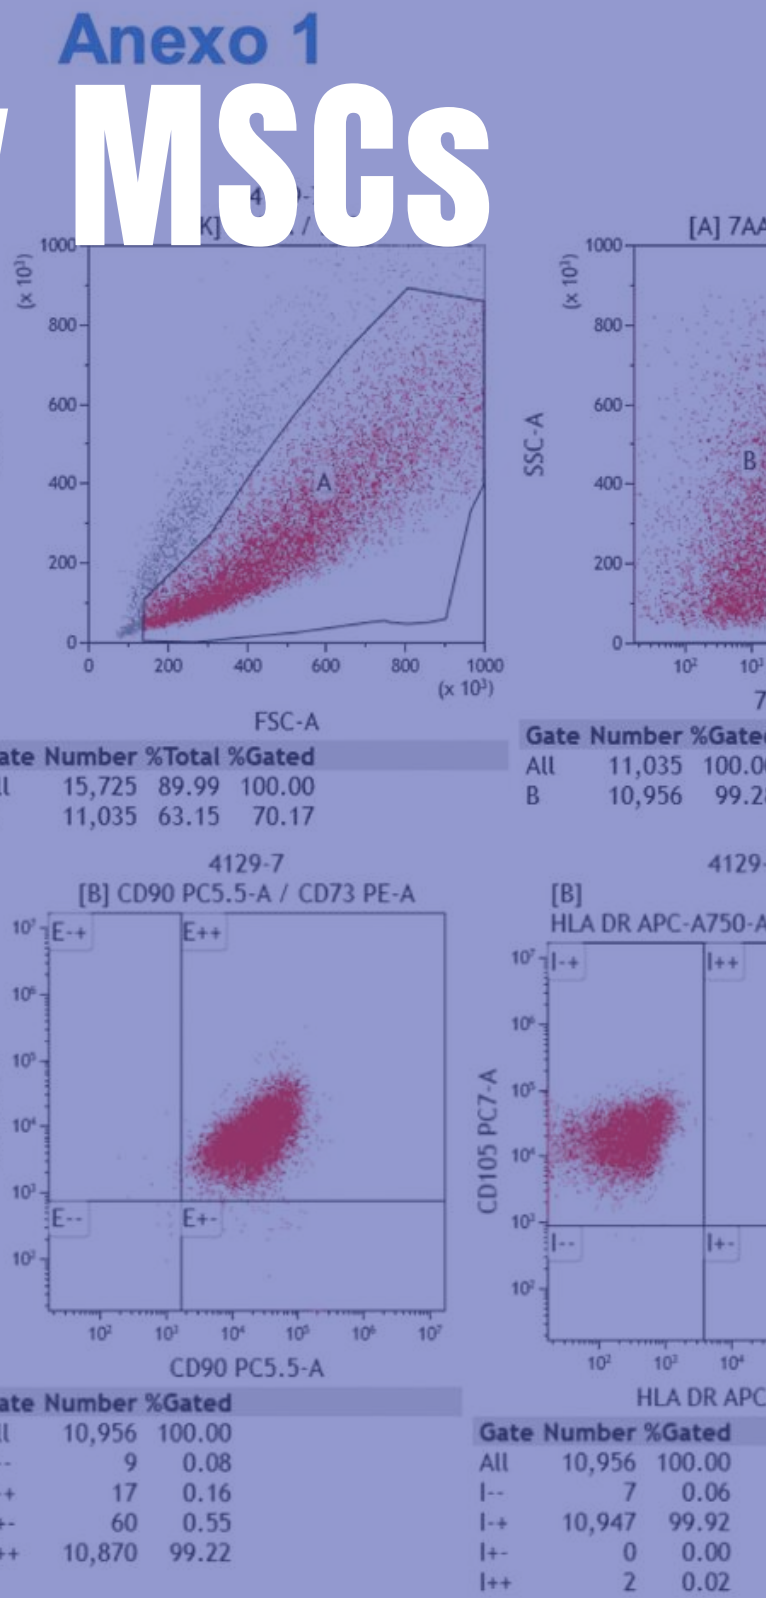

A white circular icon containing a blue checkmark.

ALLOGENEIC MSCs

- They come from ethical healthy donors.
- They are excellent for anti-aging because they are from the youngest possible tissue and their telomere length is longer.
- They replicate (expand) very quickly, so it is possible to have many cells available for treatments in a short time.
- There is no risk of rejection by the recipient because the MSCs lack human leukocyte antigen (HLA).
- Ideal for autoimmune diseases as they come from the youngest tissue with minimal immune interaction, allowing them to reprogram the recipient's immune system effectively.
- The sanitary regulation in México allows the cultivation, expansion, and therapeutic use of MSCs to those labs and clinics that have the official authorized licenses like ours.

NOAH TECH 

Our Clinics & Facilities

Located in the vibrant city of Tijuana, Mexico, just 3 minutes from San Diego, our award-winning clinic offers exceptional customer service and world-class healthcare. Unlike other clinics that lack lab facilities and use thawed frozen stem cells, our fully licensed on-site stem cell cultivation lab ensures high-potency live cells that have never been frozen. This guarantees seamless patient experiences and access to top-tier on-site and adjacent VIP facilities and amenities.
